

Hear for Norfolk Aural Care Service is here to help!

Supporting people with hearing loss
and related conditions

Do you have problems with ear wax?

If 'yes' then microsuction is the solution!

Hear for Norfolk specialises in the microsuction technique for removal of ear wax, carried out by fully trained, experienced and registered nurses, and using purposefully equipped clinics. We are an enhanced provider of this service, which means we are able to treat 'complex' and 'non-complex' patients.

Patients age 10+ who are registered with a GP Practice in the Norfolk and Waveney Clinical Commissioning Group area can be referred by their GP to Hear for Norfolk (Norfolk Deaf Association) for this treatment via eRs.

Patients who are registered with a GP Practice outside this area or do not wish to get a referral from their GP can contact us directly for an appointment, however, please note that we charge a fee of £40 for the procedure (for both ears).

We are able to see patients at our community-based and mobile ear care clinics and carry out domiciliary and care home visits for housebound people.

**Please contact us on 01603 404 440 or email
